DETAILED ACTION

Response to Amendment

1. Claims 26, 27, 39, 40, 42, and 51 have been amended in the above-identified application. Claims 1-25, 30, 33, 44, 46, 52, and 54 are cancelled. **Claims 26-29, 31, 32, 34-43, 45, 47-51, 53, and 55 are pending.**

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 26-29, 31, 32, 34-43, 45, 47-51, 53, and 55 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 26 and 27 recite that the discrete particles have a diameter between 20 and 80 microns. There is no support for such a particle size range in the original disclosure. The original disclosure (i.e., the Specification and the original claims) recite that the discrete particles have a particle size range between 12 and 60 microns. Applicants are required to cancel this new matter in response to this Office Action.

Art Unit: 1773

Applicants are further reminded that any previously applied prior art rejections may be re-instated upon cancellation of the new matter.
